PROFILE

Data analyst with 5+ years of turning data into decisions people can act on. At Syno International I own reporting from raw survey data to the SQL models, KPIs and self-service Power BI dashboards that clients use to make data-driven decisions about where to spend. I brought significance testing into a brand tracker so people stopped reacting to noise, measured the business impact of an airline's advertising, and when a number looks wrong, I find out why. Before that, my pricing work improved the precision of clients' pricing strategies by 15-20%, and I delivered insights at 95%+ data accuracy. I work in SQL, Power BI, DAX, Excel and Python, use A/B testing and other statistical methods, and I'm comfortable presenting results to technical and non-technical people alike.

TECHNICAL SKILLS

Languages & Analysis: SQL, Python, pandas, Hypothesis testing, A/B testing, Confidence intervals, Key driver analysis, Correlation analysis

BI & Visualisation: Power BI, DAX, Power Query, Power Automate, Excel, Streamlit, Plotly

KPIs & Customer Analytics: KPI design and monitoring, Funnel analysis, Cohort analysis, RFM segmentation, MaxDiff, Van Westendorp

Data Modelling & ETL: Data modelling (dimensional modelling, Medallion architecture), SSIS, dbt, AWS (Athena, Glue, S3)

Databases & Ways of Working: MS SQL Server, MySQL, PostgreSQL, Git, Jira, Confluence

WORK EXPERIENCE

Data Scientist | Syno International, Vilnius, Lithuania *Jul 2025 – Present*

- **Built an airline's marketing team a self-service Power BI report** on brand health, competitors, loyalty and positioning across its markets, so they can answer their own questions.
- **Enabled business stakeholders to explore performance across markets on their own** by designing the SQL data model behind a multi-market Power BI dashboard.
- **Made client KPIs comparable across brands and markets** by aligning their definitions with the agreed research methodology, and traced unexpected figures back to their root cause.
- **Stopped a coffee brand's team reacting to noise** by adding two-proportion significance tests to its brand tracker. Now only changes between survey waves that clear 95% significance get flagged.
- **Measured the business impact of an airline's advertising and sponsorship** by comparing brand funnel metrics for travellers who remembered seeing them against those who didn't.
- **Showed a coffee brand where to focus its effort** by mapping what consumers value against how each brand performs, separating real strengths from the gaps worth fixing.
- **Presented findings to clients** and turned survey results into clear recommendations their brand and marketing decisions could rest on.
- **Kept large Power BI reports fast and refreshing reliably** with incremental refresh and gateway fixes.
- **Partnered with cross-functional stakeholders, from project managers and sales colleagues to clients,** to shape reporting requirements and sort out issues, keeping reports useful to the people who rely on them.

Data Analyst | Syno International, Vilnius, Lithuania *Sep 2024 – Jun 2025*

- **Improved the precision of clients' pricing strategies by 15-20%** using MaxDiff and Van Westendorp.
- **Delivered insights to decision-makers at 95%+ data accuracy** with performance-tuned SQL for brand and campaign models.
- **Pointed client campaigns at the few drivers that actually move brand preference**, using key driver analysis.
- **Built Power BI dashboards with stakeholders** so global clients could track brand performance.
- **Removed recurring manual reporting steps** with Power Automate.

Technical Writer (Data Science) | DataCamp, Remote *Apr 2024 – Jul 2025*

- **Explained technical topics in plain language** for learners worldwide across 18+ peer-reviewed tutorials on Python and SQL.

Data Science Instructor | GOMYCODE, Lagos, Nigeria *Aug 2023 – Feb 2024*

- **Prepared 40+ students for data roles** by teaching Python, SQL, data analysis and machine learning through hands-on projects, and coaching them to present their results to non-technical audiences.

Business Intelligence Specialist / Data Scientist | Freelance, Remote *Nov 2020 – Aug 2024*

- **Gave client teams a clear view of their KPIs and operations** with Power BI dashboards.
- **Helped client teams actually use their dashboards** by writing plain-language documentation and how-to guides.

SELECTED PROJECTS

Retail Customer Intelligence (e-commerce customer analytics) | *retail-customer-intelligence* · *2026*

- **Turned raw e-commerce data into customer segments, churn-risk tiers and lifetime value** in dbt on Databricks, showing who is likely to leave and who is worth the most.

Energy Analytics Platform (real grid outage data) | *energy-analytics-platform* · *2026*

- **Turned messy real-world utility records into a reliable analytics dataset** that flags bad data for review instead of silently dropping it.

EDUCATION

Turing College, Micro Masters, Data Analysis & AI Ethics | Remote, Lithuania | 2024 – 2025

University of Ibadan, BSc. Mechanical Engineering | Ibadan, Nigeria | 2016 – 2023

Udacity, Nanodegree, Data Analysis | Remote | 2022

CERTIFICATIONS & PUBLICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (2023, expired)
- The Rise of the AI Data Engineer Boot Camp, DataExpert.io (Zach Wilson): Databricks, Lakebase, agentic data apps (2026)
- Co-author, "Optimization of energy grid efficiency with machine learning: A comprehensive review of challenges and opportunities", Renewable and Sustainable Energy Reviews (Elsevier), vol. 223, 2025
