## PROFILE

Data scientist with 5+ years of turning data into decisions people can act on. At Syno International I own the work from raw survey data to the KPIs, statistical tests and self-service dashboards that clients use to make data-driven decisions about where to spend. I brought significance testing into a brand tracker so people stopped reacting to noise, measured the business impact of an airline's advertising, and when a number looks wrong, I find out why. Before that, my pricing work showed clients what their customers were willing to pay and improved the precision of their pricing strategies by 15-20%. I work in SQL, Python and Power BI, use A/B testing, regression, machine learning and other inferential methods, and I'm comfortable presenting results to technical and non-technical people alike.

## TECHNICAL SKILLS

**Languages:** SQL, Python, pandas, NumPy, PySpark

**Statistics & Experimentation:** A/B testing, Hypothesis testing, Inferential statistics, Confidence intervals, Logistic regression, Key driver analysis

**Machine Learning & AI:** scikit-learn, XGBoost, TensorFlow, MLflow, Fairness evaluation, Generative AI, LangChain, OpenAI API

**Product, Customer & Pricing Analytics:** KPI design and monitoring, Funnel analysis, Cohort analysis, RFM segmentation, Gabor-Granger, Van Westendorp, MaxDiff

**BI & Visualisation:** Power BI, DAX, Streamlit, Plotly, Excel

**Data Tools:** dbt, Databricks, AWS (Athena, S3), MS SQL Server, MySQL, Git

## WORK EXPERIENCE

**Data Scientist** | Syno International, Vilnius, Lithuania *Jul 2025 – Present*

- **Stopped a coffee brand's team reacting to noise** by adding two-proportion significance tests to its brand tracker. Now only changes between survey waves that clear 95% significance get flagged.
- **Measured the business impact of an airline's advertising and sponsorship** by comparing brand funnel metrics for travellers who remembered seeing them against those who didn't.
- **Showed a coffee brand where to focus its effort** by mapping what consumers value against how each brand performs, separating real strengths from the gaps worth fixing.
- **Presented findings to clients** and turned survey results into clear recommendations their brand and marketing decisions could rest on.
- **Showed how far each airline survey figure could be trusted** by building 95% confidence intervals into the SQL reporting tables, so every percentage comes with its margin of error.
- **Made client KPIs comparable across brands and markets** by aligning their definitions with the agreed research methodology, and traced unexpected figures back to their root cause.
- **Built an airline's marketing team a self-service Power BI report** on brand health, competitors, loyalty and positioning across its markets, so they can answer their own questions.
- **Reduced manual survey and operations work** with internal AI tools built on Python, Streamlit, LangChain and the OpenAI API.
- **Partnered with cross-functional stakeholders, from project managers and sales colleagues to clients,** to shape reporting requirements and sort out issues, keeping reports useful to the people who rely on them.

**Data Analyst** | Syno International, Vilnius, Lithuania *Sep 2024 – Jun 2025*

- **Improved the precision of clients' pricing strategies by 15-20%** using MaxDiff and Van Westendorp.
- **Pointed client campaigns at the few drivers that actually move brand preference**, using key driver analysis.
- **Built Power BI dashboards with stakeholders** so global clients could track brand performance.

**Technical Writer (Data Science)** | DataCamp, Remote *Apr 2024 – Jul 2025*

- **Explained technical topics in plain language** for learners worldwide across 18+ peer-reviewed tutorials on Python and SQL.

**Data Science Instructor** | GOMYCODE, Lagos, Nigeria *Aug 2023 – Feb 2024*

- **Prepared 40+ students for data roles** by teaching Python, SQL, data analysis and machine learning through hands-on projects, and coaching them to present their results to non-technical audiences.

**Business Intelligence Specialist / Data Scientist** | Freelance, Remote *Nov 2020 – Aug 2024*

- **Built classical and neural-network models (ANN, DNN)** for research clients with scikit-learn, Keras and TensorFlow.
- **Gave client teams a clear view of their KPIs and operations** with Power BI dashboards.

## SELECTED PROJECTS

**Retail Customer Intelligence (e-commerce customer analytics)** | *retail-customer-intelligence* · *2026*

- **Turned raw e-commerce data into customer segments, churn-risk tiers and lifetime value** in dbt on Databricks, showing who is likely to leave and who is worth the most.

**Energy Analytics Platform (outage prediction on real grid data)** | *energy-analytics-platform* · *2026*

- **Made a model's accuracy claim honest** by finding target leakage in my own thesis research and reporting the real 67% accuracy rather than the flattering 82%.

**AI Ethics: Personalised Budget Prediction** | *AI_Ethics_Personalized_Budget_Prediction_Model* · *2025*

- **Made model results auditable and repeatable** with a logistic regression pipeline in scikit-learn, with every experiment tracked in MLflow.
- **Made an ML model easy for non-technical stakeholders to review** through a model card, a risk assessment and an interactive demo.

**AI trip planner on Databricks (Generative AI)** | *all-about-data-and-more* · *2026*

- **Built a tool-calling AI agent** that plans trips from live forecasts and its own search over destination data, with a fallback so users always get an answer.

## EDUCATION

**Turing College**, Micro Masters, Data Analysis & AI Ethics | Remote, Lithuania | 2024 – 2025

**University of Ibadan**, BSc. Mechanical Engineering | Ibadan, Nigeria | 2016 – 2023

**Udacity**, Nanodegree, Data Analysis | Remote | 2022

## CERTIFICATIONS & PUBLICATIONS

- The Rise of the AI Data Engineer Boot Camp, DataExpert.io (Zach Wilson): Databricks, Lakebase, agentic data apps (2026)
- Microsoft Certified: Power BI Data Analyst Associate (2023, expired)
- Co-author, "Optimization of energy grid efficiency with machine learning: A comprehensive review of challenges and opportunities", Renewable and Sustainable Energy Reviews (Elsevier), vol. 223, 2025
