PROFILE

Data scientist with 4+ years of turning data into decisions people can act on, from raw data to the statistical test, the model and the dashboard. At Syno International I brought significance testing into a brand tracker so people stopped reacting to noise, measured the business impact of an airline's advertising, and turned survey data into pricing and brand decisions for 10+ international studies. My pricing work improved clients' pricing strategy precision by 15-20%. I work in Python, SQL and Power BI, use A/B testing, regression, machine learning and Generative AI, and present results to technical and non-technical audiences alike.

TECHNICAL SKILLS

Languages: Python, SQL, pandas, NumPy, PySpark

Statistics & Experimentation: A/B testing, Hypothesis testing, Confidence intervals, Logistic regression, Correlation analysis, Key driver analysis

Machine Learning & AI: scikit-learn, XGBoost, TensorFlow, Deep learning, MLflow, Fairness evaluation, Generative AI, LangChain, OpenAI API, Embeddings

Pricing & Customer Analytics: Gabor-Granger, Van Westendorp, MaxDiff, CVI/CBI, Funnel analysis, Cohort analysis, RFM segmentation

BI & Data Platforms: Power BI, DAX, Streamlit, AWS (Athena, Glue, S3), Databricks, dbt, Git

WORK EXPERIENCE

Data Scientist | Syno International, Vilnius, Lithuania *Jul 2025 – Present*

- **Stopped a coffee brand's team reacting to noise** by adding two-proportion significance tests to its brand tracker, so only changes that clear 95% significance get flagged.
- **Measured the business impact of an airline's advertising and sponsorship** by comparing brand funnel metrics for travellers who remembered them against those who didn't.
- **Turned survey data into pricing and brand decisions for 10+ international studies** with Gabor-Granger, CVI/CBI and brand perception models.
- **Showed how far each airline survey figure could be trusted** by building 95% confidence intervals into its SQL reporting tables.
- **Showed a coffee brand where to focus its effort** by mapping what consumers value against how each brand performs in Python and Power BI.
- **Presented findings to clients and stakeholders**, turning survey results into clear, data-driven recommendations for their brand and marketing decisions.
- **Reduced manual survey and operations work** with internal AI tools built on Python, Streamlit, LangChain and the OpenAI API.
- **Protected trust in a client's brand index** by checking a rebuilt dashboard value by value against the published report and tracing every difference to its root cause.

Data Analyst | Syno International, Vilnius, Lithuania *Sep 2024 – Jun 2025*

- **Improved clients' pricing strategy precision by 15-20%** using MaxDiff and Van Westendorp to find what customers were willing to pay.
- **Focused client campaigns on the few drivers that move brand preference** through key driver analysis.
- **Delivered insights to decision-makers at 95%+ data accuracy** with performance-tuned SQL for brand and campaign models.

Technical Writer (Data Science) | DataCamp, Remote *Apr 2024 – Jul 2025*

- **Helped learners worldwide build data skills** through 18+ peer-reviewed tutorials on Python and SQL.

Data Science Instructor | GOMYCODE, Lagos, Nigeria *Aug 2023 – Feb 2024*

- **Prepared 40+ students for data roles** by teaching Python, SQL, data analysis and machine learning, and coaching them to explain results to non-technical audiences.

Business Intelligence Specialist / Data Scientist | Freelance, Remote *Nov 2020 – Aug 2024*

- **Built classical and neural-network models (ANN, DNN) for research clients** with scikit-learn, Keras and TensorFlow.
- **Gave client teams clear visibility of their KPIs and operations** through Power BI dashboards.

SELECTED PROJECTS

Energy Analytics Platform (outage prediction on real grid data) | *energy-analytics-platform* · *2026*

- **Made a model's accuracy claim honest** by finding target leakage in my own thesis research and reporting the real 67% accuracy rather than the flattering 82%.
- **Corrected the grid reliability figures** from the original thesis and served outage-type predictions from an XGBoost classifier alongside them.

AI Ethics: Personalised Budget Prediction | *AI_Ethics_Personalized_Budget_Prediction_Model* · *2025*

- **Reduced unfair outcomes across groups in a prediction model** through fairness evaluation, bias mitigation and a constraint-aware decision threshold.

AI trip planner on Databricks (Generative AI) | *modern-data-engineering-lab* · *2026*

- **Built a tool-calling AI agent** that plans trips from live forecasts and its own search over destination data, with a fallback so users always get an answer.

EDUCATION

Turing College, Micro Masters, Data Analysis & AI Ethics | Remote, Lithuania | 2024 – 2025

University of Ibadan, BSc. Mechanical Engineering | Ibadan, Nigeria | 2016 – 2023

Udacity, Nanodegree, Data Analysis | Remote | 2022

CERTIFICATIONS & PUBLICATIONS

- The Rise of the AI Data Engineer Boot Camp, DataExpert.io (Zach Wilson): Databricks, Lakebase, agentic data apps (2026)
- Microsoft Certified: Power BI Data Analyst Associate (2023, expired)
- Co-author, "Optimization of energy grid efficiency with machine learning: A comprehensive review of challenges and opportunities", Renewable and Sustainable Energy Reviews (Elsevier), vol. 223, 2025
